EDUCATION

Universidad San Francisco de Quito

B.E. in Computer Science (GPA: 4.00/4.00) · Minor: Web & App Development

Quito, Ecuador

Aug 2023 – Feb 2028

PROJECTS

Fintech Mini Bank — Python, FastAPI, Streamlit, PostgreSQL, Docker

- Full-stack fintech system for client/account management with atomic deposit, withdrawal, and transfer operations; hexagonal architecture containerized with Docker Compose.
- Applied Facade, Factory Method, Builder, and Strategy patterns; enforced configurable fee and risk-validation rules (velocity limits, daily caps, max-amount checks).

OpsCenter — Python, FastAPI, Streamlit, PostgreSQL, Docker, JWT

- Fintech incident management platform with role-based access (Admin/Supervisor/Operator), JWT auth, and a formal 5-state lifecycle (OPEN → CLOSED); containerized with Docker Compose.
- Applied five design patterns in a hexagonal architecture: Observer (event bus), Command (notification dispatch), State (lifecycle), Template Method (message builders), and Abstract Factory (per-event notification families).

Demand Prediction Service — Python, FastAPI, Streamlit, Docker, PostgreSQL

- Docker-orchestrated transport platform with REST CRUD for zones/routes and an ETL pipeline that ingests Parquet files, filters top routes, and auto-creates zones with business-rule validation.

Campus Tour Optimization — React 19, Vite, Tailwind CSS, Canvas API, Vercel

- SPA deployed on Vercel that finds optimal USFQ campus tour routes via a greedy graph algorithm, with real-time Canvas API visualization and a responsive Tailwind UI.

Web Portfolio — HTML5, CSS3, JavaScript, Github Pages

- Personal portfolio deployed on Github Pages showcasing projects and experience; focused on clean design, performance, and accessibility, with responsive layouts, optimized loading times, and adherence to modern web standards.

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, SQL, HTML5, CSS3, Bash.

Backend Frameworks: FastAPI, Flask, REST API design, JWT authentication, Swagger/OpenAPI.

Frontend & UI: React, Streamlit, Bootstrap, JavaFX, HTML5/CSS3.

Data & AI: TensorFlow, Keras, PyTorch, NumPy, Pandas, Matplotlib, Deep Learning, Neural Network Architecture.

Databases: PostgreSQL, MySQL, SQLite, Neo4j.

DevOps & Tools: Docker, Docker Compose, GitHub Actions, Git, Postman, Render, Vercel.

Design & Other: Figma, Adobe Illustrator, Photoshop, Power BI, OOP, Design Patterns, Agile/Scrum.

CERTIFICATIONS

- Cisco Networking Academy — *Linux Essentials*.
- DeepLearning.AI — *Neural Networks and Deep Learning*.
- DeepLearning.AI — *Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization*.
- DeepLearning.AI — *Structuring Machine Learning Projects*.
- IBM — *DevOps, Cloud and Agile Foundations Specialization*.
- Great Learning — *Docker for Intermediate Level*.
- Google — *Introduction to Git and GitHub*.
- Canvas Credentials (Badgr) — *GSL Classroom (COIL Methodology): Collaborative Work across Tec. de Monterrey, University of Florida, USFQ, Bridgewater State University and Newcastle University*.
